

# FLX-400

## BENDING TEST BENCH

GROWTH

PRODUCTIVITY

QUALITY

The SmartMill FLX-400 system is a **LABORATORY CLASSIC TOOL REINVENTED WITH THE NEW AUTOMATION TECHNOLOGY**

### BENEFITS

Accuracy of readings

Timeliness

User-friendly interface

Operational simplicity

Quick and easy mechanical set-up

Reliability of the system

Electronic Data must be export on Excel

### MAIN CHARACTERISTICS:

- Determine the modulus of elasticity «MOE» and the modulus of rupture «MOR» of the boards
- Completely automated test sequences
- Operation software programmed on Allen-Bradley platform
- Operator interface easily accessible via a touch screen
- Loading carried out via a servomotor
- Automatic recording of the board's moisture content
- Automatic calibration of the system loadcell with a reference loadcell – no dynamometric ring needed
- Electronic weighing system available

## TECHNICAL SPECIFICATIONS

### FEATURE

### VALUE

Lumber Size	2x3 @ 2x8
Lumber length	6 @ 16 ft
Footprint	10 ft
Controls and HMI	Allen-Bradley
Servomotor and servo-drive	Bosch Rexroth 2hp

SmartMill is a people-oriented company offering innovative lumber processing systems integrating robotics, vision and artificial intelligence.

SmartMill also provides continuous education for all its clients to improve managerial and operational knowledge and skills to all employees.
